

Product information

OK 2000 – CL # 385

OKULEN® OK 2000 - CL is a premier UHMW Polymer with the highest available compression strength and Shore D hardness in the market today. This material is corrosion resistant and has an excellent abrasion resistance properties for the most toughest applications.

Technical Values:

Properties	Unit	OK 2000-CL
abrasion index	%	64
compressive stress	psi	1800
density	g/cm ³	0,96
Shore hardness	D	67

Properties:

excellent abrasion properties
even against aggressive media
higher shore hardness D
ultimate compressive stress

Color:

red # 385

Application fields:

Lining of trucks, buckets, chutes, hoppers, rail cars everywhere, where impact strength and abrasion resistance is important with good non-stick release material flow
Designed for off-road heavy earth moving and mining equipment.

The above data are based on the present knowledge and are given without guarantee.
Existing laws and conditions are to be respected by the user of our products.
